DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 recites the limitation "said flames" in claim 1 step (b). There is insufficient antecedent basis for this limitation in the claim. Clearly, the word "flames" is a typographical error and that the word should be "frames"; for art related examination purposes, examiner will interpret "said flames" as "said frames". Correction is required.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-11 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Art Unit: 2626

Claims 1-11 are directed to a mathematical calculation which does not fall into one of the enumerated four categories of patent eligible subject matter recited in 35 U.S.C. 101 (process, machine, manufacture, or composition of matter).

Claims 1-11 are not directed toward:

1) a process/method (nothing is processed/transformed, the claims are toward the calculation of noise measurements; a statutory "process" under 35 USC 101 must (a) be tied to another statutory category (such as a manufacture or a machine), or (b) transform underlying subject matter (such as an article or material) to a different state or thing.

Claims 1-11 neither transform underlying subject matter nor positively recite structure associated with another statutory category, and therefore do not define a statutory process. 2) a machine i) there are no claim elements towards an appropriate apparatus, e.g. the elements of a device that would perform the claim steps. 3) a manufacture (no claim elements pertain to an output product nor a 4) a composition of matter

Allowable Subject Matter

5. Claims 1-11 are allowable over the prior art of record. Examiner notes that in the preamble of claim 4, the phrase "if noisy" has been interpreted as "of noisy". Correction is required.

Art Unit: 2626

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please see related art listed on the PTO-892 form.
